

Environmental Policy

Gratte Brothers Group Limited is concerned for the environment and the potential effect that its activities are having upon it. The Directors are committed to stating objectives, measurable targets and to the prevention of pollution.

This policy statement outlines Gratte Brothers Group Limited's commitment to environmental issues and to continual improvement of its environmental performance by implementing performance measurement and awareness training throughout the group.

This policy will be made available to the public and other interested parties.

The scope of the environmental policy covers legislative and regulatory requirements, design, installation and maintenance and extends to all our sites.

The existing and potential suppliers who have an environmental policy will be looked upon favourably and those whom appear on our approved supplier listing who are not actively addressing environmental issues will be encouraged and assisted to do so.

Under the leadership of the Group Quality and Environmental Director a management system has been developed which is appropriate to the nature, scale and environmental impacts of the Group's activities and services. This management system is designed to meet the requirements of the client, is fully documented and is third party certificated to ISO 14001.

The environmental policy will be reviewed by the Board of Directors annually.
